

WE SAY...

- ➔ PUBLICLY OWNED, FUNDED & RUN NHS
- ➔ INVEST IN EDUCATION TO EQUIP FUTURE GENERATIONS
- ➔ INCENTIVISE SMALL & LOCAL BUSINESSES
- ➔ FAIR & EFFICIENT TAXATION SYSTEM WITH PROPER ENFORCEMENT

REVAMP OUR DEMOCRACY

If the past few years have proved anything, it's that our democracy is not fit for the challenges it faces.

- ➔ REGIONAL ASSEMBLIES FOR ENGLAND
- ➔ FREE UP LOCAL GOVERNMENT TO INVEST
- ➔ ELECTORAL REFORM
- ➔ MAXIMISE TRANSPARENCY
- ➔ CITIZENS ASSEMBLIES

Trust voters to rank their preferences

PETER SIMS
WYCOMBE

authored reports for the Climate Jobs Project .

He believes that there is a need to increase diversity among those representing us, so that our government may better represent those it serves.

He considers it important that society addresses the underlying causes, rather than just consequences of issues we face. For example, 'GDP' or 'Growth' is frequently deemed an end goal, which neglects what really matters to both people and society as a whole.

Surely improving the quality of life of people today as well as future generations should be the ultimate target, with the following as intermediate goals:

- ➔ Reducing inequality
- ➔ Increasing social mobility
- ➔ Avoiding catastrophic climate change

A PEOPLE'S VOTE

GREEN NEW DEAL

A FAIR SOCIETY FOR ALL

REVAMP OUR DEMOCRACY

Green Party
for the common good

GREEN NEW DEAL

Action needed to address Climate Change and Biodiversity Loss.

Invest in Public Transport:

- Regular, reliable services
- Clean electric/hydrogen buses/trains
- Cheap & simple ticketing
- Integrate bus/train/ferry services
- Connect towns with each other not just London

Invest in Homes:

- More zero carbon social housing
- Street by street improvement program focusing on worst quality housing

Invest in Renewable Energy:

- Funding to support community energy projects
- Local plans used to identify sites for renewable energy

Invest in Farming & Forestry:

- Support horticulture, urban greening, and tree/hedge planting
- Refocus subsidies toward supporting agricultural jobs, reducing emissions, and mixed/rotational/organic practices
- Establish Land Commission to investigate land ownership in context of net zero

EDUCATION

- ➔ Public information campaign to inform public of their role in Green New Deal
- ➔ Skills for the future for all ages
- ➔ Smaller class sizes and fewer tests

NHS

- ➔ Focus on prevention
- ➔ End internal privatisation
- ➔ Integrate health and social care

LOCALISATION

- ➔ Value local food production
- ➔ Support local supply chains
- ➔ Minimise travel times to access public services

EUROPEAN UNION

The EU currently serves corporate interests rather than the interests of UK citizens, yet past UK governments have resisted attempts to improve it. The Green Party believes that we must remain in the EU to change it, as managing global commons requires governance beyond nation states. However, we recognise that there are a wide range of strongly felt opinions so the only democratic way forward is to have a referendum on any deal.

LOCAL PRIORITIES

- ➔ **Oppose road & airport expansion**
They increase air pollution and are incompatible with climate change targets.
- ➔ **End arbitrary housing building targets**
Focus job creation in areas with surplus housing instead.
- ➔ **Improve walking and cycling provision**
More cycle lanes, pedestrian areas, 20 mph zones, wider pavements.
- ➔ **Protect the Commons**
Common land and facilities should be expanded, not developed on or privatised.
- ➔ **Facilitate sustainable self builds**

GREEN VOTES COUNT

Green voters elected seven members of the European Parliament and doubled the number of local councillors in 2019.

Voters are taking action on climate. The green vote is reaching a historic high. If ever there was a time to vote Green, that time is now!
